***Detailed Action***

***Response to Amendment***

1. Applicant's Remarks/Arguments filed on 6/25/2007 regarding claims 1-10, 12-26, 28-33 have been fully considered. Claims 11 and 27 have been canceled by applicant.

***EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE ✓***

2. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a network switch, including the unique functions of:

“the slot assembly unit being configured to receive cells from the at least one cell accumulation buffer and package the received cells into cell slots to be stored in the second memory, wherein, when the data is stored in the second memory, global storage of data is initialized and continued until a last slot is stored.”

The closest prior art, Headrick et al. (USP 5,724,358), discloses a network switch that comprises an input translation unit, a buffer manager unit, a routing unit, and first and second linked-list memory units for receiving, storing and retrieving data cells. However, Headrick fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
